15 Meter Skip Distance Chart

# 15 Meter Skip Distance

- Select the F2 layer ionosphere height  $h_mF2$  from the appropriate Ionosonde Site by clicking on Ionogram under the Current Conditions tab of the web site [www.skywave-radio.org](http://www.skywave-radio.org) (for example Port Arguello, CA  $h_mF2 = 250$  km trace)
- Select the current critical frequency  $F_c$  by clicking on Critical Frequency under the Current Conditions tab (for example  $F_c = 10$  MHz)
- From the intersection of the height and  $F_c$  traces read down to the Distance axis
- This is the approximate skip distance (600 miles in this example) for the current conditions
